

OSINT Threat Intelligence Dashboard - Day 27 Report

Day 27 - Push Project to GitHub

Overview:

On Day 27, the OSINT Threat Intelligence Dashboard was finalized and published to GitHub.

This included pushing all commits, tags, and creating the final GitHub Release.

Key Steps:

1. Confirmed local repo was up to date with 'git status'.
2. Committed and pushed all pending changes.
3. Tagged the final release version (v1.0).
4. Published the release on GitHub with release notes.
5. Verified repository visibility and release files.

Outcome:

The project is now available as an official GitHub release, marking the successful completion of the 27-day development journey.
