OSINT Threat Intelligence Report
Day 25 – Project Setup & GitHub Integration

Generated: 2025-08-20 14:07:36 UTC

Achievements

- Created `PROJECT_SETUP.md` with full installation & usage guide.

- Linked local repo with GitHub and pushed changes securely.

- Migrated from HTTPS + password auth to SSH key-based auth.

- Resolved GitHub push conflicts using safe rebase strategy.

- Generated final PDF reports with email delivery.

Lessons Learned

- Never commit secrets (use `.env` instead).

- GitHub requires SSH or Personal Access Tokens (not passwords).

- Rebasing keeps history clean when syncing with remote.

- GitGuardian scans repos for exposed secrets in real time.

Status

 Project setup finalized, GitHub integration secured, documentation in place.
